JAYA SUKSES

A hand with a watch and a ring is holding a rectangular piece of light-colored wood panel. The background is dark and features a product catalog with various wood samples and text. The overall tone is professional and focused on the company's products.

Since 1995

Sahabat Jaya Sukses, founded in 1995, operates as a trusted distributor and manufacturer of construction and architectural surface materials in Indonesia. We supply Plywood, MDF, Blockboard, and related panel products to the construction and furniture industries, supporting projects across residential, commercial, and industrial sectors.

FROM US, TO YOU

A clear expression of our commitment, shared values, and the standards we uphold in every product and service we provide.

WHAT GUIDES EVERY STEP WE TAKE

RESPONSIVENESS THAT DELIVERS

We listen, adapt, and respond quickly to client needs.

QUALITY THAT YOU CAN RELY

Every board meets strict standards for strength and consistency.

30 YEARS OF EXPERIENCE

Built on trust, dependable service, and long-term partnerships.

A SYMPHONY OF
**WOOD &
CREATIVITY**

● PRODUCT FEATURES

VERSATILE APPLICATION

Suitable for furniture, interior, construction, decorative panels, cabinetry, partitions, and project-based applications.

WIDE PRODUCT RANGE

Available in plywood, MDF, particle board, blockboard, film face plywood, HPL, and aluminium composite panel.

STABLE & RELIABLE BOARD QUALITY

Designed to provide consistent flatness, strength, and performance according to each product specification.

SMOOTH SURFACE FINISH

Suitable for laminating, pressing, painting, cutting, edge banding, and other secondary processes.

DURABLE MATERIAL PERFORMANCE

Offers dependable performance for both functional and decorative applications.

FLEXIBLE DESIGN OPTIONS

Available in various thicknesses, sizes, colors, textures, grades, and surface finishes.

COST-EFFICIENT MATERIAL SOLUTION

Provides material choices from economical boards to premium decorative surfaces.

LOW EMISSION & MOISTURE RESISTANT OPTIONS

Selected products are available with E1 glue, moisture-resistant, or exterior-grade specifications.

EASY PROCESSING & INSTALLATION

Can be easily cut, shaped, laminated, drilled, pressed, and installed based on project requirements.

SUITABLE FOR PROFESSIONAL USE

Ideal for contractors, furniture manufacturers, interior designers, architects, and project buyers.

Products Details

PLYWOOD

HOKI

HOKI provides a diverse range of panel products designed for interior, furniture, and structural applications from Plywood and Film Face Plywood to PVC Board and other complementary solutions.

Our wood-based products are manufactured using responsibly sourced Indonesian timber in accordance with SVLK certification requirements, with attention to consistent quality and dependable performance.

SINGA

SINGA

SINGA is our elevated plywood range, developed with a focus on material consistency, structural integrity, and refined surface quality. Built with selected wood veneers and a well-constructed core, SINGA offers reliable dimensional stability and workability for furniture, interior, and construction applications.

SEMAR is our accessible plywood range, developed for everyday project requirements and budget-conscious applications. With a straightforward specification suited to general furniture, interior works, joinery, and light construction, SEMAR provides a practical material choice for a wide range of routine needs.

Plywood

Plywood is a high-performance engineered wood panel constructed from multiple cross-laminated veneer layers, delivering exceptional dimensional stability, structural strength, and warp resistance.

Dimensions

915 x 1830 mm
1220 x 2440 mm

Thickness

2.7 - 18 mm

Glue

E1, MR

Grade

BBCC, UTYBTR, UTY
& NON SANDING

Plywood - Meranti

Premium Heavy-Duty Grade. Built entirely from high-density Meranti hardwood veneers for maximum structural integrity, superior screw-holding power, and high resistance to heavy loads and moisture.

Dimensions

1220 x 2440 mm

Thickness

2.7 - 18 mm

Glue

MR

Grade

BBCC, UTYBTR, UTY
& NON SANDING

Plywood - Albasia

Lightweight & Economical. Features a light-density core ideal for light-duty furniture framing, backings, ceiling panels, and projects where weight reduction and easy handling are primary requirements.

Dimensions

1220 x 2440 mm

Thickness

2.7 - 18 mm

Glue

MR

Grade

BBCC, UTYBTR, UTY
& NON SANDING

Plywood - MC

Balanced Strength & Versatility. A hybrid hardwood blend offering enhanced density and load-bearing strength. The ideal, cost-effective choice for general furniture making, wall paneling, and interior joinery.

Dimensions

1220 x 2440 mm

Thickness

2.7 - 18 mm

Glue

E1, MR

Grade

BBCC, UTYBTR, UTY
& NON SANDING

Plywood MLH/Combi

Designed to bridge the gap between lightweight softwood panels and heavy hardwoods, our Combi or Mixed Light Hardwood (MLH) plywood range offers the ideal compromise between structural durability and panel weight.

Dimensions

1220 x 2440 mm

Thickness

9 - 18 mm

Glue

E1, MR

Grade

BBCC

Plywood - Bending

Innovative plywood panel specifically engineered to bring complex curved architectural and interior concepts to life. Manufactured with a specialized veneer core orientation, this board delivers exceptional flexibility, allowing it to bend effortlessly into tight radiuses without cracking, splitting, or fracturing the wood surface.

Dimensions

1220 x 2440 mm

Thickness

3 - 10 mm

Glue

MR

Grade

UTY

Plywood Melaminto

An innovative engineered panel combining a premium, multi-layered plywood core with a decorative melamine surface. Bonded under high-pressure thermal technology, it delivers a flawlessly smooth, scratch-resistant finish that eliminates the need for manual workshop lamination.

Dimensions

1220 x 2440 mm

Thickness

3 - 24 mm

Finishing

Doff, Glossy

Sides

Single Faced / Double Faced

Filmface

Heavy-duty construction panel coated with a water-resistant phenolic film overlay. This protective film prevents moisture absorption from wet concrete, preserving the structural strength of the concrete mix while producing an exceptionally smooth, flat, and clean concrete finish.

Dimensions

1220 x 2440 mm

Thickness

2.7 - 18 mm

Glue

MR, WBP

Sides

Single Faced / Double Faced

Plywood - Resin

High-grade plywood board coated with a specialized resin compound (phenolic/polyester resin) on its surface. This resin layer provides a durable protective barrier, rendering the panel exceptionally resistant to water absorption, high humidity, mild chemicals, and surface abrasion.

Dimensions

1220 x 2440 mm

Thickness

12 - 18 mm

Side

Single Faced

Bangau delivers high-value plywood and blockboard panels tailored for everyday interior and structural joinery. Built with a solid core construction, consistent dimensional stability, and a smooth surface finish, Bangau panels offer strong screw-holding capacity and effortless workability. It serves as an accessible, high-performance substrate for contractors, interior fabricators, and furniture manufacturers seeking budget-friendly materials without compromising structural integrity.

Products Details

BLOCKBOARD

Blockboard - Albasia, MC

Block Board features a solid core composed of edge-glued wooden strips sandwiched between outer veneer layers. Renowned for its exceptional bending resistance, flat surface consistency, and high screw-holding power, Block Board is the premier choice for long horizontal spans such as wardrobe doors, tabletops, and custom shelving, where preventing sag or warping is critical.

Dimensions

915 x 1830 mm
1220 x 2440 mm

Thickness

12 - 30 mm

MR

Grade

UTY, BBCC

Blockboard - Melaminto

Block Board Melaminto combines the high rigidity and warp resistance (anti-warping) of a solid wooden strip core (barecore) with a clean, pre-finished melamine surface. This combination yields a thick, highly stable panel engineered for long horizontal spans and vertical joinery, while delivering a pristine, professional interior finish. It is the premier choice for full-height wardrobe doors, room partitions, custom shelving, and heavy-duty interior fixtures.

SPF

PT Sumatera Prima Fibreboard (SPF) is one of Indonesia's leading manufacturers of high-performance Medium Density Fibreboard (MDF) and High Density Fibreboard (HDF). Powered by state-of-the-art manufacturing technology and a commitment to international standards, SPF delivers precision-engineered fiberboards featuring a homogeneous core density and an ultra-flat surface. Material solutions from SPF are engineered to offer outstanding durability, seamless production efficiency, and refined performance for modern furniture manufacturing, interior fit-outs, and architectural applications.

Products Details

MDF & MDF HMR

MDF (Medium Density Fiberboard)

Is a high-performance engineered wood panel manufactured from fine wood fibers bonded with synthetic resin under high heat and pressure. Free of natural grain direction, MDF offers uniform density throughout the board, making it exceptionally easy to cut, route (CNC), and shape without the risk of splintering or edge chipping.

Dimensions

1220 x 2440 mm
1220 x 3048 mm

MDF HMR (High Moisture Resistant)

MDF HMR (commonly known as Green Core MDF) is a specialized grade of MDF formulated with water-resistant resin binders (such as Melamine-Urea Formaldehyde). Specifically engineered to withstand high humidity environments and frequent moisture exposure, MDF HMR features a significantly lower swelling rate and superior structural integrity compared to standard MDF

PARTICLE BOARD

Particle Board

Is a widely used engineered wood panel manufactured by bonding wood chips, shavings, and timber by-products with synthetic resin under high heat and pressure. Engineered with a multi-layer structure featuring fine wood particles on the outer surfaces and dense flakes at the core, provides an exceptionally flat, smooth, and consistent substrate. Particle Board is the premier, budget-friendly choice for mass furniture manufacturing, serving as an ideal base for melamine lamination, HPL overlays, paper foils, and wood veneers in dry indoor environments.

ALVIC is a Spanish company with a global presence, a leader in the manufacture and distribution of high-quality panels and furniture components for the furniture and decoration industry. Present in over 100 countries across the 5 continents, with technologies such as LUXE, ZÉNIT and SYNCRON that are market leaders.

The Beauty Of The Natural Finish

SYNCRON by ALVIC is a textured surface composed of an attractive and extensive range of designs that offer spaces with great naturalness and a high decorative level. It is developed on a particle base, on which the decorative paper impregnated with resins and additives is pressed. The unique resin and additive formula, developed by ALVIC, allows achieving very realistic relief finishes and greater depth of detail.

Our experts carefully select, using state-of-the-art technology, the finishes for each design, always seeking the best synchronisation between each design and finish and creating a highly realistic surface that recreates in our collections wood, textiles, stone and other materials. Syncron is an eco-friendly option with an antibacterial treatment that offers a durable, easy-to-clean surface that is ideal for use in furniture, interior design, and wall panelling.

A Matt Surface Without Limits

ZENIT by ALVIC is a supermatt lacquered surface with a soft, velvet texture that adds elegance and softness to any space. This technology is composed of a quality MDF board, on which the decorative paper impregnated with resins and additives is pressed. The unique resin and additive formula, developed by ALVIC, provides the best finish. Finally, a layer of supermatt lacquer with UV radiation drying is applied to the front face, which gives our products their high resistance, durability and unique physical-mechanical properties.

Zenit surface offers a supermatt, silky touch finish that is also anti-fingerprint. In addition, it is highly resistant to scratches and abrasion, making it ideal for use in all types of furniture and interior decoration. Zenit is available in a wide range of colours, making it suitable for any interior design style, and it is an excellent choice for any space that requires a high quality supermatt surface with durability.

ALUSTRO FOR INTERIOR

PE LITE, PE 1100, PE 1100 DOUBLE SIDED

Engineered for elegance and performance, our interior grade Alustro ACPs offer a lightweight and durable finish ideal for wet kitchen and other interior needs that require high moisture resistance performance.

With a wide range of colors and textures, they bring modern aesthetics and lasting quality to every space.

PRODUCT SPECIFICATION

Panel thickness (mm)	3
Aluminium Skin Thickness (mm)	0.1
Alloy Grade	1100
Dimension (mm)	1220 x 2440
Coating	Polyester (PE)
Core	Polyethylene Core

ALUSTRO FOR EXTERIOR

PVDF 3003

Built to withstand the elements, our exterior grade ACPs combine strength, weather resistance, and modern design to elevate your exteriors. Ideal for facades, cladding, and architectural exteriors, they deliver long-lasting performance without compromising on style.

PRODUCT SPECIFICATION

Panel thickness (mm)	4
Aluminium Skin Thickness (mm)	0.3
Alloy Grade	3003
Dimension (mm)	1220 x 2440
Coating	Polyvinylidene Fluoride (PVDF)
Core	Polyethylene Core
